

## Using Tableau Desktop with Amazon Redshift

- AWS RedShift

The screenshot displays the AWS RedShift console for the Oregon region. The top navigation bar includes the AWS logo, a search bar, and user information. The main dashboard is divided into several sections:

- Overview:** Displays key metrics for the region: 1 Cluster, 1 Total nodes, 1 On-demand nodes, 0 Reserved nodes, 0 Reserved nodes used, 0 Reserved nodes available, 0 Snapshots, 0 Automated, and 0 Manual.
- Cluster overview:** Shows the status of clusters: 1 Available, 0 Modifying, 0 Unavailable, and 0 In Maintenance. It includes a graph for the number of queries, database connections, disk space used, and CPU utilization.
- Query overview:** Displays query performance metrics: 0 q/s Query throughput, 0 Avg queue length, 0 s Avg run time, and 0 s Avg wait time.
- Alarms:** Shows 0/0 CloudWatch alarms with no ongoing alarms.
- Events (1):** Lists recent events, including a message about an Amazon RedShift cluster 'qls-19152749-6e4912c-fcf81d5eb-redshiftcluster-w0axr737yysm'.

The screenshot shows the AWS Redshift console interface. The top navigation bar includes the AWS logo, 'Services', and the user's profile 'awstudent @ 9944-1591-5357' in the 'Oregon' region. The breadcrumb trail indicates the path: Amazon Redshift > Clusters > qls-19152749-6e4912cfcf81d6eb-redshiftcluster-w0axr737ysm.

The main content area is titled 'qls-19152749-6e4912cfcf81d6eb-redshiftcluster-w0axr737ysm'. It features a 'General information' section with the following details:

- Status:** Available
- Node type:** dc2.large
- Storage used:** 1.09% (1.74 of 160 GB used)
- Date created:** Mon Sep 28, 2020 17:09:79(-07:00)
- Number of nodes:** 1
- Endpoint:** qls-19152749-6e4912cfcf81d6eb-redshiftcluster-...
- JDBC URL:** jdbc:redshift://qls-19152749-6e4912cfcf81d6eb-...
- ODBC URL:** Driver={Amazon Redshift (x64)}; Server=qls-19...

Below the general information, there are tabs for 'Cluster performance', 'Query monitoring', 'Maintenance and monitoring', 'Backup', 'Properties' (selected), and 'Schedule'.

The 'Cluster permissions' section shows that the cluster needs permissions to access other AWS services. It lists the 'Attached IAM roles' as 'qls-19152749-6e4912cfcf81d6eb-RedshiftRole-LKAQIOVIFPUD' and 'in-sync'. A 'Copy Amazon Resource Name (ARN)' button is available.

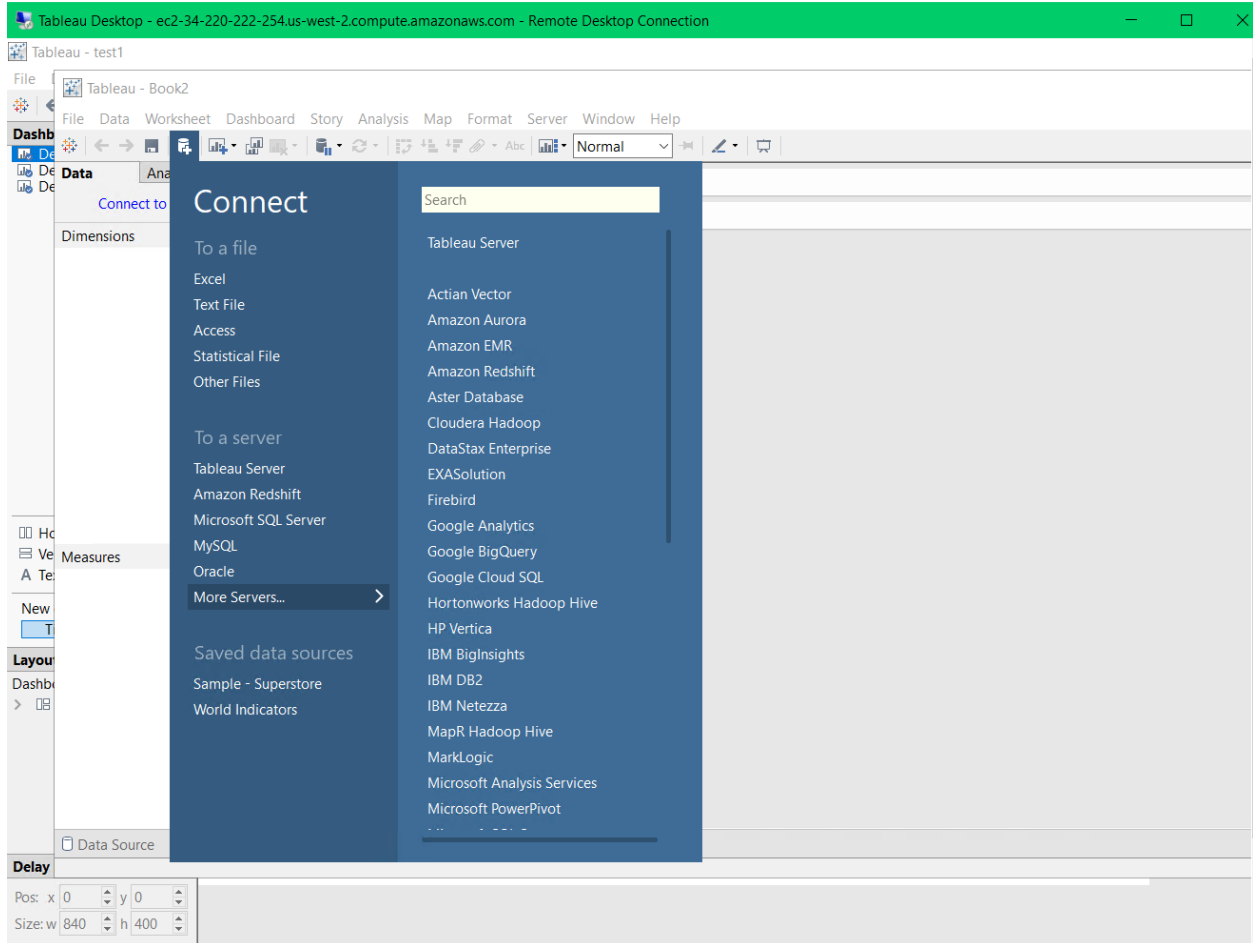

The 'Connection details' section shows the 'Master user name' as 'administrator' and a 'Change master user password' button. The 'Endpoint' is 'qls-19152749-6e4912cfcf81d6eb-redshiftcluster-w0axr737ysm.cm3ehge16ibx.us-west-2.redshift.amazonaws.com:5439/faq' with a 'Copy' button.

The 'Cluster details' section shows the 'Cluster identifier' as 'qls-19152749-6e4912cfcf81d6eb-redshiftcluster-w0axr737ysm', 'Node type' as 'dc2.large', 'Number of nodes' as '1', and 'Total available storage' as '160 GB'. A 'Resize' button is present.

At the bottom, there are 'Tags' including 'LabName : 3023' and 'CustomerName : run', and an 'Additional details' link.
